

Managed Print Services (MPS)

are designed to take full responsibility for the management of your entire printing infrastructure, from Copying, Scanning, Printing and Faxing.

An MPS includes everything from print lifecycle management to comprehensive maintenance support including the supply of consumables.

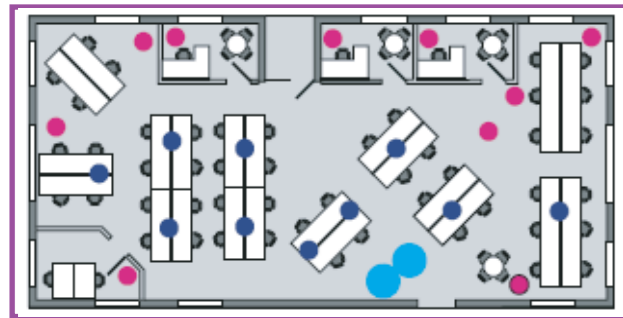

It's designed to allow your organisation the flexibility to focus on core business activities by removing the burden of managing your print device fleet.

MPS solutions cover not only OKI products but a wide range of multi-vendor printing devices.

In summary, it's the implementation of an effective print and copy strategy designed to deliver increased visibility and control over print service's with improved device availability, environmental benefits coupled with significant cost reductions.

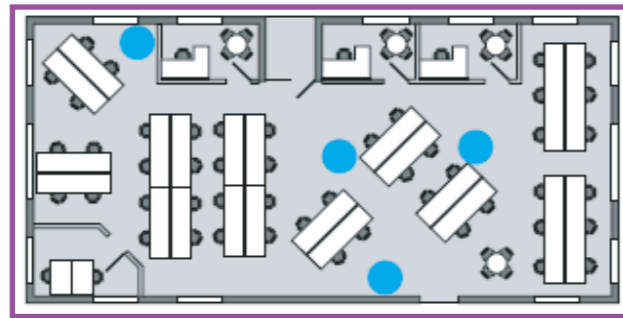

The perfect solution to give you peace of mind.

Optimising Your Device Layout

Standard Office Layout Pre-Assessment:

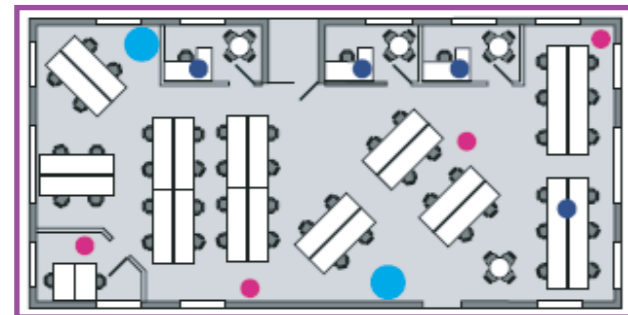

Observation: High volume of desktop printers, limited workgroup products and large central devices

Office Layout Post-Assessment By A Standard Vendor:

Observation: No desktop printers or workgroup devices and a limited number of large centralised units. This can have a negative impact on productivity.

Companies typically have many more devices than they need. In some cases up to 10 times more!

Office Layout Post-Assessment By OKI Printing Solutions:

Observation: An optimised fleet with the right products in the right place, based on the requirements of the organisation.

- Large Centralised Units
- Workgroup Units
- Desktop

Why OKI Printing Solutions?

OKI is a global business-to-business brand that is challenging the traditional conventions of in-house printed communications, to bring proven business benefits and cost savings to businesses of all sizes.

OKI was established in Ireland in 1990 to provide distribution, service and support for our extensive range of Printers and Multifunction Products (MFP's) for business. Since then our operations and business have grown rapidly throughout the island of Ireland along with the evolution in the IT market-place. We are now a leader in Colour technology and

business printing solutions, with a fast growing emphasis on total managed printing services for the enhancement of our customers' business productivity.

Efficient and friendly customer relations are of central importance and are provided by 60 people employed between our Dublin headquarters and regional representation in Belfast, Cork and Galway. Our sales and engineering staff work closely with our key partners to offer integrated IT solutions with maximum customer value.

The Environment

The wider environmental consequences of increasing printing efficiency are substantial.

CEBR estimates that UK and Irish firms could reduce carbon dioxide (CO²) emissions by up to 182,000 tonnes per year and reduce their carbon fuel use by up to 89,000 tonnes per year.

A mid-sized car driving 20,000 km per year will produce 3.67 tonnes of CO² per year. Therefore the reduction in CO² from more efficient in-house printing in the UK and Ireland is akin to removing more than 49,000 cars from UK and Irish roads.
